CPSC 1301, Computer Science I Quiz

Quiz 11a

This is a timed test. You have thirty minutes to complete the test. Your deliverable will be a plain text file, that is, an ASCII file with a `.txt` file extension. When you finish the test, upload your deliverable to Canvas. Do not publish your answer to your `git` repository.

You may work with your study partner for this quiz. In fact, working together is strongly encouraged. If you work with a partner, you must each make a seperate submission for credit, but you must also include the names of both authors in your submission.

1   Instructions

This should be an extremely easy quiz. You have done all this before. If you don't remember, review your previous quizzes. Here are the requirements:

1. Open the file `presidents_long.csv` in the Quizzes directory.

2. Declare a list valiable and initialize it with an empty list.

3. Read in each line as a string, and append each line in your list variable.

4. Scramble (shuffle) the list, so that the list elements (lines) are out of order.

5. Print the (scrambled) list to the screen.

This quiz is in the nature of a review and prepatory to the upcoming Exercise.
