CPSC 1301, Computer Science I Quiz

Quiz 10b

This is a timed test. You have thirty minutes to complete the test. Your deliverable will be a plain text file, that is, an ASCII file with a `.txt` file extension. When you finish the test, upload your deliverable to Canvas. Do not publish your answer to your `git` repository.

You may work with your study partner for this quiz. In fact, working together is strongly encouraged. If you work with a partner, you must each make a seperate submission for credit, but you must also include the names of both authors in your submission.

1 Instructions

Write a (very simple) database application that (1) displays a menu of three items, (2) allows a user to add a person's favorite, (3) allows a user to see all favorites, and (4) allows the user to quit when finished. "Favorites" can be ice cream, pizza toppings, girl or boy friends, or something else — your choice. Use a dictionary to hold the user/favorite pairs. See below for the expected output.

2 Output

```
This is quiz10b
Welcome to my Ice Cream Favorites

Enter 1 to add a person's favorite
Enter 2 to see all favoritess
Enter 9 to exit

1
Adding ...
